

Morningside Pharmaceuticals

Products Booklet

Making *quality* *healthcare* an affordable and accessible reality throughout the world

About Morningside

We're proud to be an award winning innovator, manufacturer and supplier of generic and branded medicines and healthcare products to the United Kingdom and international export markets.

Our product portfolio contains more than **276 Marketing Authorisations** for generic and branded licensed medicines in the UK and Globally.

Our Markets

Customers choose us because of the assured quality of our products, outstanding customer service, advanced logistics, dedicated warehousing and the cost-effective solutions our teams offer.

In the UK, our licensed pharmaceutical products are distributed twice daily to NHS hospitals and pharmacies.

Globally, we are one of the largest suppliers of a wide range of quality medicines and medical devices to UN organisations, NGOs, Aid agencies and charities – having exported to more than **120 countries** since inception.

We also work with public bodies and private sector customers in the different countries where we operate. By working closely with our international partners we are always looking to build new partnerships with reputable distributors of pharmaceuticals, whose products and services complement our new and existing range.

Our Service

We guarantee the highest possible quality, both in terms of products and service, wherever in the world you may be.

You can be assured that our storage and deliveries will be **secure** and **temperature controlled**, including **cold chain**. All administrative procedures, such as purchasing, customer service and quality management, are coordinated from our **Leicestershire headquarters in the UK**.

Internationally, we work in partnership with distributors and agents whose values match our own. We qualify all partners to ensure they meet the highest customer care standards and most stringent quality controls.

In 2020 we received full **Authorised Economic Operator (AEO-F)** status from HMRC. This confirms that our supply chain is safe and secure and is recognised by the EU and many other countries internationally.

Quality

All of our generic and branded pharmaceutical products carry a Marketing Authorisation issued by the **Medicines and Healthcare products Regulatory Agency (MHRA)**.

And our Quality Management System complies with a number of international accreditations and standards including **(EU GMP)**, **(EU GDP)** and **ISO 9001: 2015**.
